PROTECTION ELEMENTS

PROTOCOLS

NUMBER OF SURVEYS FROM THE SECTOR → 3789

2. Biosafety protocols for the conduct of work activities

8 out of 10 individuals

indicate that the institutions where they worked established these protocols (with significant disparity by region)

3 Pressure about their tasks

75%

Increased a lot or quite a lot To incorporate new skills, along with longer working hours, resulted in high levels of work-related pressure

70%

Perceived that the intensity, the rhythm and the number of working hours increased

4 Break periods

82%

State that their break periods were reduced

5 Training in a different area of knowledge to collaborate with the fight against the pandemic:

70%

Regions where this situation is prevalent

Africa 78% Asia Pacific 73%

RECOMMENDATIONS

A Establish the mandatory provision of protective and care items to the staff.

B Design and implement unified protocols regarding working areas, break times, handling of sanitary materials, and psychological support.

C Establish an assistance fund for healthcare personnel for acquiring the necessary items in a pandemic response.

D Set and regulate minimum break times for healthcare personnel.
