Felt concern about the lack of medical attention in case of having health problems during a trip

Specific Conclusions
Transports and logistics

PERSONAL SAFETY

TRAVELS FRONTIERS

SANITARY DOCUMENTS

NUMBER OF SURVEYS FROM THE SECTOR → 2845

4 Safety during a trip

The highest levels of fear in Africa

5 Sanitary documents

Felt concern for not having the sanitary documents for entering another country or province

6 Border closures

Felt fear about not being able to return to their families after a work trip

RECOMMENDATIONS

Provide workers with better technology to simplify border crossings.

Install medical assistance stations and healthcare centers at border crossings to provide workers with basic medical check-ups.

Strengthen border points with multiple service areas, such as: family communication, family reunification, general information, special medical care services, specific recommendations, and distribution of hygiene and personal care items.

Review and modernize bureaucratic procedures at borders and enhance the mechanisms to ensure coordination and collaboration among relevant authorities to simplify transportation across borders.

Recognize transportation and logistics workers as essential personnel, with the same guarantees as other essential workers.
